

The presentation title  
goes here

**Author**

Date or event

# Different background

Author

Date or event

Or even a plain color, especially if your title is very long and leaves no space for what's behind the colored box

# Title page

The cover image can be changed by using the command `\def\titlefigure{...}` before `\titleframe`, as long as the figure as a 2:1 aspect ratio.

For example:

```
\def\titlefigure{elements/title-page-image-alt}
```

If you want a solid color, use `\def\titlefigure{}`

The command

```
\setlength{\titleboxwidth}{0.65\textwidth}
```

changes the width of the titlebox if you need more space.

# Aspect ratio

The official ETH template only comes in 16:9.

You can obtain 4:3 slides by passing the option `aspectratio=43`

```
\documentclass[11pt,aspectratio=43]{beamer}
```

In this case, you probably want to use the cover image

```
\def\titlefigure{elements/title-page-image-43} or any other image in 14:10 aspect ratio, for  
example \def\titlefigure{elements/title-page-image-alt-43}
```

# Font size

The font sizes match the official ETH template quite accurately when the default option 11pt is used.

You can get slightly smaller or larger text by passing the options 10pt or 12pt, respectively.

```
\documentclass[10pt,aspectratio=169]{beamer}  
\documentclass[11pt,aspectratio=169]{beamer} % default  
\documentclass[12pt,aspectratio=169]{beamer}
```

You can also fine-tune the font sizes by modifying the `beamerfontthemeeth.sty` file.

# Colors

You need to pick these colors

- `accentcolor` (alert text, blocks)
- `titlefgcolor` (the box on the title page)
- `titlebgcolor` (the background on the title page, in case you don't use an image)

Use these commands at the beginning of the document

```
\colorlet{titlefgcolor}{ETHGreen}  
\colorlet{titlebgcolor}{ETHGreen}  
\colorlet{accentcolor}{ETHRed}
```

# Title

## Subtitle

Text and some **alert text**

$$m_a^\top h(\cdot)$$

- list one
- list another one
  - test 1
  - test 2

# Outline

1. Layout
2. Text and colors
3. Blocks and boxes
4. Figures and tables
5. URLs and links

# Title with no subtitle

## Large box

Notice that blocks are a bit larger than the text, that's intended.

Column environments also eat some margins. Use the option `[onlytextwidth]` if you want to align columns to the wide blocks.

## Small box

With some more text

Think outside the box!

# Outline

1. Layout
2. Text and colors
3. Blocks and boxes
4. Figures and tables
5. URLs and links

And, of course, figures!

# Tables

Don't use vanilla L<sup>A</sup>T<sub>E</sub>X tables please

Item		
Animal	Description	Price (\$)
Gnat	per gram	13.65
	each	0.01
Gnu	stuffed	92.50
Emu	stuffed	33.33
Armadillo	frozen	8.99
